Descripción:

Se desarrolló un sistema de venta de boletos para cine utilizando Windows Forms, aplicando herencia y polimorfismo. Se trabajó mediante GitHub Flow usando ramas, Pull Requests y resolución de conflictos.

Capturas del conflicto:

The screenshot shows a GitHub pull request interface. At the top, the pull request title is "Clase Boleto General, Y la implemente al funcionamiento del formulari..." with the commit hash 8d604f1. A conflict resolution banner is displayed, stating "This branch has conflicts that must be resolved" and listing the conflicting files: "taquilla de cine/Form1.cs" and "taquilla de cine/taquilla de cine.csproj". A "Resolve conflicts" button is visible. Below the banner, there is a "Merge pull request" button and a link to "View command line instructions". On the right side, there is a sidebar with sections for "assignees" (No one assigned), "Labels" (None yet), "Projects" (None yet), "Milestone" (No milestone), and "Developer" (Successfully issues, None yet). At the bottom, there is a "Add a comment" button. The bottom part of the screenshot shows a code diff view for the file "feature/boleto-gen..." with a "1 conflict" indicator and a "Mark as resolved" button. The code snippet visible is:

```
ctions.Generic;  
nentModel;  
  
ng;  
  
ding.Tasks;  
ws.Forms;  
rine.Resources;
```

```
74     }
75
76     Accept current change | Accept incoming change | Accept both changes
77     <<<<<< feature/boleto-general (Current change)
78     private void Form1_Load(object sender, EventArgs e)
79     {
80     }
81     =====
82     //private void LimpiarCajas()
83     //{
84     //    txt_precio.Clear();
85     //    txt_matricula.Clear();
86     //    cbo_TipoBoleto.SelectedIndex = -1;
87     //    txt_precio.Focus();
88     //}
89     >>>>>> master (Incoming change)
90     }
91 }
92
```
